

# eAuditor on-premise or cloud®?

Choose a model to suit your needs

**eauditor**

## eAuditor cloud®

Enhanced version of the system available in SaaS model. New functionality, automation, AI support, instant access from anywhere – no local installation required.

### For whom?

For organizations that focus on flexibility, speed and development towards modern IT solutions.

**eauditor**

## eAuditor on-premise

Stable, standalone solution installed on the customer's infrastructure. Full control over the server, compliance with internal security policy, no dependence on external network.

### For whom?

Ideal for organizations that prefer the classic deployment model.
